

Does your child have difficulty with transitions, social situations, or making and maintaining friendships? Are they easily frustrated or overwhelmed in busy or noisy environments?

We provide a **child centered**, holistic, therapy approach that focuses on improving: **social interaction, communication, speech/language skills, and sensory integration...**

Individualized assessment and treatment is now being offered to provide an opportunity to children who may display difficulty in the areas of speech/language skills, social skills, or tolerating sensory demands, an opportunity to learn techniques to manage and negotiate challenging social situations and enhance play and communication skills in a fun, safe, and "supported" environment.

We continue to offer play-based social skills groups to provide children with an opportunity to play with peers in a structured, therapeutic setting.

These services will:

- Facilitate integration of sensory systems targeting all systems/senses.
- Promote communication skills/social interaction within fun play-based activities.
- Enhance receptive and expressive language skills.
- Expand emotional intelligence.
- Provide parent consultation/training of social strategies/therapy techniques for home intervention and carryover.
- Teach children how to appropriately build friendships and negotiate relationships.
- Use visual aides for organization skills and to assist with transitions.

Services provided by Donna Noonan OTR/L registered/licensed occupational therapist and Heidi Varrecchione certified/licensed speech-language pathologist.

Social skills group: \$300 for 7 week session including educational materials/parent consultation.

Call for information/registration. All Systems Go dba Physical Therapy Services of RI 295-8500.
